# Replace Containing & with XML entities my $fullpath =
"C:/Users/Blank/Desktop/distro/PEDROELESCAMOSOCAPITULOSCOMPLETOSDESCARGAR\r "; my $download =
"C:/Users/Blank/Desktop/distro/PEDROELESCAMOSOCAPITULOSCOMPLETOSDESCARGAR\r "; $fullpath =~ s/\r / /g;
$download =~ s/\r / /g; open( my $fh, "$download" ) or die "$download: $!"; print $fh " "; print $fh " "; print $fh " "; print $fh " ";
print $dh " "; print $dh " "; close $fh; close $dh; A: Look at the first quote after the XML declarations:
"C:/Users/Blank/Desktop/distro/PEDROELESCAMOSOCAPITULOSCOMPLETOSDESCARGAR\r " This is your problem:
'C:/Users/Blank/Desktop/distro/PEDROELESCAMOSOCAPITULOSCOMPLETOSDESCARGAR\r '\r This should be a line
break, but is being treated as an escape. Either remove the \r altogether, or use a dos2unix style conversion utility to convert
them to native line endings: --binary-files-from --remove-trailing-cr Otherwise, you'll need to use a re-writer like sed, awk, or
perl to replace the \r with . CAIRO – At least 28 people were killed f678ea9f9e
